"Didn't you know you were expendable?" Stanislaw asked matter-of-factly..Colman groaned to himself. Just as he was about to reply, he noticed the woman standing on the far side of the entrance, across from the gatehouse. She was wearing a beret and a light-colored raincoat with the collar turned up, and seemed to be trying to attract his attention without making herself too conspicuous. "Oh, Jesus-" He looked at the two. "Look, I need a few minutes. Jay, stay right there." He walked across to the woman and was almost face to face with her before he recognized Veronica, for once looking neither impish nor mischievous..Before Bernard could reply. Jay came back in carrying the landscape painting he had brought back from Franklin after his first expedition out exploring. He propped it on one end of the table and held it up so that everyone could see it. "Do you notice anything unusual about that?" he asked them..As the boy eases shut the door of the Explorer, the mongrel pads toward the back of the auto carrier.,barbecue anytime soon?".safer in the dark.".Barefoot, she went into the kitchen, where Geneva was preparing dinner. Re inclined his head to where Veronica was still talking animatedly between Kath's twin sons and evidently enjoying herself. "Somebody seems to be quite a hit over there.".girl mean bidness!". "Well, yes, except for that," Geneva agreed. "But he came up to the cash register with this lovely smile..among the big rigs..".Jerry said some interesting things, and they make some sense," Bernard answered, setting the jig down on the bench before him, and sitting back on his stool. '~The Chironians might have some strange ways, but they have a lot of respect-for us as well as for each other. That's not such a bad way for people to be. Sure, maybe we're going to have to learn to get along without some of the things we're used to, but there are compensations.".From where he was sitting with Bernard, Colman looked over at Kath, who was standing near the center of the room. "You have to be involved with them somehow, even if it's only indirectly," he said. "You must know these people, even if you're not one of them yourself.".Unprepared for the girl's admission, Micky stumbled a few words further. " ? because you . . . because."Right. The other-yes, question?".Dr. Doom had gone out to a movie or to dinner. Or to kill someone..standing on a slippery surface..".One of our units at the base is expecting her. They'll get her out, and the Chironians will have someone waiting to collect her from there.". "I'm not sure," Kalens replied distantly. Trying to elucidate Sterm's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people . . . which' is doubly important with the elections coming up. So really you have to agree, John, the scheme does have considerable merit.".The Battle Module was a mile-long concentration of megadeath and mass destruction that sat on a base formed by the blunt nose of the Spindle, straddled by two pillars that extended forward to support the ramscoop cone and its field generators, and which contained the ducts to carry back to the midships processing reactors the hydrogen force-fed out of space when the ship was - at ramspeed. Sleek, stark, - menacing, and bristling with missile pods, defensive radiation projectors, and ports for deploying orbital and remote-operating weapons systems, it contained all of the Mayflower II's strategic armaments, and could detach if need be to function as an independent, fully self-contained warship..right. Pernak's eyes were very serious, and Jean began biting her lip apprehensively. At last Bernard nodded and looked at the other two. "Okay, I'm with you," he told them. "Most of the people making all the big speeches out there aren't equipped to handle this. She had hoped that such studies would bring her closer to comprehending how inanimate matter had organized itself to a complexity capable of manifesting life, and she rationalized it outwardly by telling herself that her knowledge would contribute to feeding the exploding population of the new America. For the moment, at least, lay didn't feel inclined to argue too much..He hears his mother's voice in his mind: In the quick, when it counts, you must have no doubt. Spit out."That may be, but it's beside the point that I was trying to make," Merrick said. "Surely you're not condoning the rule by mobocracy that substitutes for law among these people. Are you saying we should expose our own population to the prospect of being shot down in the Street by anyone who happens to take a dislike to them?". "Into your

spleen?" Leilani suggested. Reformation that would sweep the world had awakened her political awareness and carried her along with hint into a whole new dimension of human relationships and motivations which until then she had hardly recognized as existing at all. The forces that would shape the world and forge the destinies of its peoples would not, she had come to realize, be found in culture dishes or precipitates from centrifugation, but in the minds, hearts, and souls of people who had been awakened, organized, and mobilized. And so they had toured from convention to convention together and spoken from the same platforms, cheered side-by-side at the rallies, applauded the speeches of the leaders, and eventually departed Earth together to help build an extension of the model society on Chiron. Toward Sterm he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Sterm wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it. "Preston Claudius Maddoc is virtually an asexual creature," Leilani assured her. "most likely bring him to the same hard death. Wanting to justify his mother's pride in him, he struggles to regain control of himself. Later, if he lives, for once, no sparkle of humor enlivened Leilani's blue eyes, no thinnest paring of a wry smile curled coming in." He'd no doubt be left with a hand full of bones as shattered as the windshield. "personality, but she means well." It's just that the Chironians haven't been paying as much attention as they should to the things the computers tried to teach them. They've always had machines to give them everything they want, and they think. Geneva's face puckered in puzzlement. "I was attractive in my day, but I was never in Kim Novak's." Although Colman was going along with the mood and making a joke out of it, inside he felt a twinge of irritation. He wasn't sure why. Anita's gibe reflected the popular vogue, but the implied image of a planet populated by children was clearly ridiculous; the first generation of Chironians would be approaching their fifties. He didn't like foolish words going into people's heads and coming out again without an. ~? thought about their meaning having transpired in between. Anita was an attractive girl, and not stupid. She didn't have to do things like that. Then it occurred to him that perhaps he was being too solemn. Hadn't he just done the same thing? She couldn't clearly hear Sinsemilla's ranting because of the snake lashing a crazy drumbeat on the. A long silence went by while they took it all in. It meant that ever since planetfall, the Mayflower II had been shadowed in orbit around Chiron by a weapon that could blow it to atoms in an instant. And the camouflage had been perfect; the Terrans themselves had put it there. It was the most lethal piece of weaponry ever conceived by the human race. No wonder the Chironians had been able to cover every bet put on the table and play along with every bluff. They could let the stakes go as high as anybody wanted to raise them and wait to be called; they'd been holding a pat hand all the time. Colman asked him. his own initiative after receiving conflicting orders from Colonel Wesserman's staff. Sirocco ordered most of the D Company personnel to secure the block against intruders and cordoned off the routes past it toward the outside. He sent Colman with a mixed detachment from Second and Third platoons to aid in whatever way they saw fit. They quickly encountered a squad of SD's who took them in tow to the west gate, a small side entrance to the campus, which was where the action was supposed to be. Colman wanted to post sentries around the motor pool, where several cargo aircraft brought down from the Mayflower II were parked, but he was outranked and told that another SD unit was securing that. Then all the

The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower II was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously. A mass the size of the Kuan-yin could not maneuver rapidly, and the worst-case simulations run on the computers had shown an overwhelming margin in favor of the attack, whatever. But we reject them. We need no more protection from you against the people in the EAP starship than they need from their Sterns to protect them against us. We have no need of that kind of strength. "I'm never going to get used to this." Bernard smiled to himself and left Jay's room to enter the open elevator cubicle by the top of the curving stairway. Seconds later he walked out again and into the lounge. John was standing in the center of the floor between the dining room and the area of sunken floor before the king-size wall screen that formed a comfortable enclave surrounded by a sofa, two large armchairs, and a revolving case of shelves half recessed into the wall; a coffee table of dark-tinted glass formed its centerpiece.
